

DPW Department – Highway and Buildings and Grounds Q1 FY 2021 Report

Building and Grounds – The Conex box was emptied and is now being utilized as storage. With the onset of Corona virus many residents are purchasing grave lots. Roadways in the cemeteries were graded to improve the driving surface. Improvement to the DPW office is 95% complete. The exterior of the DPW office had facial & window rot. New windows, siding and gutters were added to improve the exterior appearance and sustain the building over time.

Highway – Prep work on the roadside of Orchard Lane for the water line grant project. Several highway projects were completed, Turner Lane and Gray Road were reclaimed and paved. Partridgeville Road was overlaid, Main Street, South Road, and Brooksville Road were cold planed and paved. Red letters were sent to residents on Anderson and Charlotte advising of necessary repairs prior to paving season. Items for annual surplus auction were listed and offered to departments throughout town, then a viewing was held for the public and an opportunity to bid was presented. An early windstorm caused much debris and created clean up of trees and branches.
