Cases attributed to BNH (Alliance Health)	0
Cases attributed to TDC	0
Cases attributed to Templeton residents	2

.....
Previous cases:

Recovered	659
Total deaths including (BNH)	17

.....

Templeton has **two** active cases as of 7/26/2021; both will be clear as of July 31st. If you or someone you know wishes to be vaccinated, please contact your personal care physician, or contact your local pharmacy to see if they are providers.

How do you know if you are a close contact of someone with COVID-19? Go to [Appendices | CDC](#) to find out!

The CDC has recommendations for both vaccinated and unvaccinated individuals, for more information on both please go to [When You've Been Fully Vaccinated | CDC](#) and [COVID-19: Considerations for Wearing Masks | CDC](#).

It has been a long almost two years having children remote learning from home and working from home, not only that – it has been incredibly wet weather! Is it time to have your septic tank pumped out and receive a once over? It is recommended that a septic system be cleaned out every two – three years, earlier if it has seen a lot of action! For more information on septic system care, please go to [Homeowner's Guide to Septic Systems: Long Version \(epa.gov\)](#) and never, ever flush anything other than toilet paper, especially not “flushable” wet wipes! Thank you to a resident with a septic system for this suggestion!
